REACH COMPLIANCE

(Registration, Evaluation, Authorization and restriction of Chemicals)

Covers Candidate List of 223 substances last updated January 17, 2022

Registration, Evaluation, Authorization and restriction of Chemicals, or REACH, consists of legislative framework developed by the European Union to manage the risks that chemicals may pose to human health and the environment. This framework requires industry to register chemicals used in their products with the European Chemicals Agency (ECHA).

Shimifrez Inc and our vendors continue to assess and monitor the REACH requirements as they pertain to the products we sell.

As of this date, our vendors have determined that the products and materials sold to Shimifrez do not contain any significant amounts of chemical compounds on the Candidate List of Substances of Very High Concern (SVHC).

Therefore, these products are considered compliant with European Union SVHC regulations.

We will continue to work with our vendors to determine how the REACH requirements will impact our business.
